COVID VACCINE ADVERSE EVENTS NOTIFICATIONS

TOTAL REPORTS

RATE PER MONTH

TYPE	PERIOD	EVENTS	DEATHS	EVENTS	DEATHS
All Vax (Not CV19)	1971-80	137	1	1.142	0.008
All Vax (Not CV19)	1981-90	304	2	2.533	0.017
All Vax (Not CV19)	1991-00	2,016	9	16.80	0.075
All Vax (Not CV19)	2001-10	6,740	21	56.17	0.18
All Vax (Not CV19)	2011-20	9,001	24	75.01	0.20
All Vax (Not CV19)	2021-22	1353	3	386.57	0.30
All Vax 50 Years Total Deaths Prior to CV-19 =			60		
CV-19 ONLY	21 - 22	115,353	798	11,535	80

Note: CV-19 Data from 22/2/2021 (From the start of the vaccine campaign)

PLEASE NOTE: AusVaxSafety.org.au that after a survey return of **6.13 million** vaccinated Australians—it reports that the actual CV19 Vaccine Adverse Events is **44.8%** of the dispensed jabs. The number of jabs to date is **55,149,115**. When extrapolated

that's **24,706,803 Adverse Events not 115,353** (to 14/3/22)

of which 1.0% or **551,491** people **attended emergency** or required **medical attention**.

"Never before has the onus been placed on scientists outside the vaccine companies to prove danger. It has always been the responsibility of the companies to prove safety and a lack of data regarding harm does not equal confirmation of safety."

- TGA Adverse Events Notification is voluntary, **so under-reporting is a fact!**
- The CV-19 data is from 22/2/21 to 13/3/2022 - **12.75 months only!**
- Of course, correlation doesn't mean causation ... however, the adverse events notification numbers are significantly larger than all the combined reports from the previous **50 Years**. **This must raise suspicion and alarm!**
- The Australian data is certainly reflective of data reported from around the rest of the world.
